PROFESSIONAL SUMMARY

Final-year Computer Engineering student with hands-on experience building Generative AI applications, AI agents, and Retrieval-Augmented Generation (RAG) pipelines. Proficient in designing and deploying LLM-powered systems, agentic workflows, and end-to-end AI solutions. Experienced in integrating large language models with real-world data sources to create intelligent, context-aware applications. Passionate about advancing AI engineering through practical implementation of cutting-edge NLP and deep learning techniques.

TECHNICAL SKILLS

AI & Generative AI: Large Language Models (LLMs), Generative AI, Prompt Engineering, Fine-Tuning, Retrieval-Augmented Generation (RAG), Agentic AI, AI Agents, Multi-Agent Systems

Programming & Frameworks: Python, LangChain, LlamaIndex, FastAPI, Flask

Data & Analysis: Pandas, NumPy, Matplotlib, Seaborn, SQL, Exploratory Data Analysis (EDA), Data Visualization

Tools & Platforms: Jupyter Lab, Google Colab, VS Code, GitHub, Conda, Hugging Face, OpenAI API

Soft Skills: Problem Solving, Analytical Thinking, Technical Documentation, Communication

EXPERIENCE

Futurism Technologies *(Present)*

AI Engineer Intern

- Designed end-to-end RAG pipelines using LangChain and vector databases, and integrated LLMs like OpenAI GPT into production applications, optimizing for accuracy and performance.
- Built autonomous AI agents with multi-step reasoning capabilities, collaborating cross-functionally to deploy generative AI features that reduced manual processing time and improved information retrieval.

ARTY Static Workshop – Indian National Army, Devlali, Nashik *Feb 2025 – Apr 2025*

Freelance Mobile Application Developer

- Developed an offline-first mobile application using React Native and Expo to digitize duty reporting workflows, reducing manual paperwork for operational staff.
- Implemented automated PDF and Excel report generation, improving reporting accuracy and operational efficiency.
- Integrated structured data storage for reliable record management and streamlined data retrieval.

PROJECTS

1. RankRight – Agentic AI Hiring System

- Built an Agentic AI-powered hiring platform using LLMs, LangChain, and RAG to autonomously process candidate emails, classify applications, and extract structured data, reducing manual screening effort by 70%+.
- Designed a scalable multi-agent architecture integrating vector databases and Generative AI workflows to evaluate candidates on skills and job fit, enabling automated shortlisting, resume ranking, and recruiter insights generation.

2. AI Chatbot – Conversational Agent with RAG and Multi-Turn Memory

- Designed a generative AI chatbot using LangChain, OpenAI GPT, and RAG pipelines with multi-turn memory, grounding responses in domain-specific knowledge bases across PDF, DOCX, and web-scraped content embedded in ChromaDB.
- Deployed the chatbot as a Flask web application, implementing advanced prompt engineering and semantic retrieval to reduce hallucinations and improve factual accuracy across extended, context-aware conversations.

EDUCATION

Sandip Institute of Technology and Research Centre *Nov 2022 – Jun 2026*

B.E. Computer Engineering | GPA: 7.2 | Nashik, Maharashtra

RYK College *Feb 2020 – Mar 2022*

HSC (12th) – 68% | Nashik, Maharashtra

St. Lawrence High School *Mar 2019*

SSC (10th) – 80% | Nashik, Maharashtra
